

YAWEN ZUO

Target Position: Quantitative Finance | 15194107021 | yawen_zuo76@163.com

EDUCATION BACKGROUND

Bachelor of Science, Applied Statistics Specialist, Mathematical Sciences Minor
UNIVERSITY OF TORONTO

Sept 2022 - Jun 2026

GPA: 3.5/4.0

- Relevant coursework: Probability, Regression Analysis, Time Series Analysis, Stochastic Processes, Bayesian Statistics, and Multivariate Statistics.
- Mathematics coursework: Calculus, Differential Equations, Combinatorics, Complex Variables, Nonlinear Dynamics and Chaos.
- Built solid foundations in data analysis, statistical modeling, and quantitative research.

PROFESSIONAL EXPERIENCE

INTEGRATED FINANCE INTERN

Jul 2025 - Sept 2025

SHENWAN HONGYUAN SECURITIES CO., LTD.

Jinan, Shandong, China

- Supported multiple bond issuance projects by preparing financial analyses, project proposals, and compliance materials.
- Conducted market and policy research to evaluate credit risk, pricing strategies, and investment value for project execution and investment judgment.
- Assisted with financing-related materials and analytical support for institutional and government financing initiatives.

BOND DEPARTMENT INTERN

May 2024 - Jul 2024

SINOLINK SECURITIES CO., LTD.

Jinan, Shandong, China

- Drafted bond issuance proposals, legal opinions, and compliance filings for debt financing projects.
- Built and reviewed Excel-based financial models for credit analysis, risk assessment, and return projection.
- Supported underwriting and investment decisions through financial statements, data-driven documentation, and model-based analysis.

DATA ANALYST INTERN

Jul 2023 - Aug 2023

YANTAI BIG DATA DEVELOPMENT GROUP CO., LTD.

Yantai, Shandong, China

- Used Python, SQL, and R for large-scale data processing and validation, supporting financial services and smart transportation projects.
- Applied R, SAS, Excel, and Tableau to statistical analysis, automated reporting, visualization, and process documentation.
- Organized workflow documentation and analytical outputs to improve cross-team communication and operational clarity.

PROJECT EXPERIENCE

KAGGLE MACHINE LEARNING MODELING COMPETITION

Nov 2024 - Dec 2024

- Conducted exploratory data analysis on a high-dimensional dataset; applied log transformation to the target variable and feature standardization.
- Trained and optimized Bagging, LASSO Regression, and Random Forest models for feature selection and predictive modeling.
- Achieved 3rd place among 90 teams, demonstrating strong model development, optimization, and interpretation skills.

IMPACT ORIGIN, WORKPLACE EDUCATION PROGRAM

Oct 2025 - Nov 2025

TEAM MEMBER

Toronto, Canada

- Conducted technology industry and business analysis on economic trends, financial performance, and consumer behavior, producing analytical briefs and dashboards.
- Participated in North American company case projects and client communication, translating research findings into actionable business recommendations.
- Supported the final business case presentation by organizing analysis, key insights, and practical strategy recommendations.

CERTIFICATIONS & COMPETITION

- Google Data Analytics Professional Certificate (12/2025); Tableau Desktop Specialist (03/2025); SQL for Data Science (01/2025).
- SAS Base Program (01/2025); Data Analysis and Visualization Foundations (01/2026); Analyzing Time Series and Sequential Data (12/2025).

SKILLS

- Programming: R (Advanced), Python (Proficient), SQL (Proficient), SAS (Good).
- Tools and Analytics: Microsoft Office (Proficient), Tableau (Good), data cleaning, validation, exploratory analysis, statistical modeling, visualization, and quantitative research.

PROFESSIONAL SUMMARY

- Applied Statistics student with a Mathematical Sciences minor, combining strong foundations in statistics, mathematics, data analysis, and quantitative research.
- Experience across securities firms and data-analysis roles, including bond project analysis, financial modeling, risk assessment, data processing, and visualization.
- Seeking fintech-related opportunities where quantitative analysis and financial context can support risk management, quantitative research, data products, or business analysis.
